### Company Description

F1 Security is a leading company in the web security industry, committed to providing customers with a safe digital environment through continuous innovation. As a certified information security service provider by the Ministry of Science and ICT, we offer information security consulting services to both public institutions and private companies.

### Product

#### UWSS (Unified Web Security Service)

**Function and Usage :** UWSS (Unified Web Security Service) is an all-in-one SECaaS platform offering global cloud security. It integrates WebCastle (WAF), WSFinder (Anti-Web Shell), and WMDS (Web Malware Detection) in a subscription service. Customers can manage all solutions through a centralized cloud system, eliminating the need for an on-premises server. UWSS covers prevention, blocking, and post-incident management, with options for integrated or individual installations based on customer needs.

**Marketing and Selling Points :** UWSS has launched its latest version, integrating AI technology to address emerging web security trends and threats. It ensures optimal protection through continuous updates, product improvements, and tailored services. UWSS adapts to each market's unique needs, offering customizable features and additional services based on customer demands. Ongoing technical support and training enable effective use of the platform. With regular updates to combat evolving cyber threats, F1 Security strives to enhance global competitiveness, increase UWSS's recognition, and meet diverse customer requirements.
