### Company Description

We are shaping the future of human-computer interaction with our AI-powered glasses, offering a gateway to infinite possibilities within the metaverse.

### Product

#### MyAI

**Function and Usage :** Provides AI and hearing assistance functions targeting the socially disadvantaged.

1. Acoustic Echo Cancellation

This technology cancels multi-channel echo signals in an audio system where the echo signals for from multiple speakers are input to microphones.

2. Beamforming

This technology enhances the clarity of the user's speech from multi-channel microphone signals in real-world noisy environments.

3. Acoustic Noise Cancellation

This technology makes the user's speech clear by processing signals from multiple microphones

**Marketing and Selling Points :** We specialize in providing AI-powered hearing assistance solutions for people with hearing impairments

Building on this foundation, we aim to expand our offerings to include a wide range of AI solutions designed to assist individuals with visual, speech, and hearing disabilities, enhancing their quality of life Furthermore, we deliver integrated technology solutions tailored to the specific needs of various industries.
