Company Description

Sakak leads the user-centric AI era with hyper-personalized AI Agent solutions that prioritize explainability, compliance, and sustainability. Backed by a team of AI PhDs, IT architects, privacy specialists, and global sales professionals with over 20 years of experience, we deliver tailored, hyper-personalized AI services for businesses.

Product

CANDiY AI Agent

Function and Usage :

CANDiY AI Agent is an advanced AI solution designed to securely utilize a company's sensitive data, enabling it to deliver hyper-personalized and highly accurate responses. It provides privacy-preserving AI services by storing both data and models directly in a user-controlled private data storage. Additionally, it seamlessly integrates with external data sources to further enhance its personalization capabilities, ensuring an optimized and context-aware user experience.

Marketing and Selling Points :

- Strong Data Privacy (+EU AI Act)**
User data is stored exclusively on the user's device.
- Hyper-Personalized Responses**
Provides domain-specific AI models and personalized answers utilizing user data.
- Data Integration**
Integrates external data directly within the chat interface without switching services.
- Deploy Anywhere : From Server to Mobile**
Integrates with any platform seamlessly
- Low Operating Costs**
Reduces infrastructure costs through on-device AI training and services.
